

*Expanding your collaborative sourcing tools,
From procurement to transportation.*

Overview

Often times, sourcing decisions are a complex blend of aggregating demand, validating supply, managing the commitments at each receiving location, and taking into account the full landed cost of each item (FOB and Freight Costs). Buyers find it difficult to bring the timely and accurate data together they need because the information comes from multiple sources and systems. The iTrade Carrier Request for Quote feature enables you to utilize your iTrade solution to easily manage lane rates from multiple zones, carriers, and time frames.

Comprehensive Price Management

iTrade enables companies to aggregate demand from multiple receiving locations, incorporate estimated freight costs based on each specific ship from and ship to location, combine the FOB and freight costs (landed cost) in the on-line negotiations, manage currency conversions when needed, and manage the commitments for each location from one end to end highly collaborative and tightly integrated system.

Carrier RFQ Features

- > Manage multiple carriers, segments, and receiving zones from your procurement portal
- > Streamline PO creation process and vendor selection
- > Manage multiple receiving locations and rates

Benefits

- > Improved production planning by negotiating total demand and supply
- > Improved margins by combining with iTrade Landed Cost Analyzer, making the best decisions based on total landed costs
- > Improved service levels by matching demand needs and vendor commitments

The screenshot shows the iTradeNetwork Carrier RFQ interface. At the top, there's a navigation bar with the iTradeNetwork logo, user name 'Generic Retailer', and various utility links like 'Off', 'On', 'Note', 'User Guide', and 'Log Off'. Below this is a 'Dashboard Status' and 'Create RFQ' button. The main section is titled 'RFQ Status - Generic Retailer' and contains a search bar with filters for 'Search by RFQ Name', 'Select Segment', 'Select Receive Zone', 'Select Ship Zone', and 'Select Carrier'. There are also filters for 'Start Date' (01/04/2013), 'End Date' (1 year), and 'Global: Active'. A 'Search' button and a 'Save Price' button are also present. The main table displays RFQ data with columns: RFQ Name, Segment, Receiving Zone, Shipping Zone, Start Date, End Date, Carrier Name, Market, Load, Loads, Offer Price, Target Pri..., Awa..., Create D..., and Note. The table lists multiple RFQs for 'MARCH LANE RAT...' with various segments and zones, showing carrier names like 'MCCI CARRIER 2' and 'DEMO CARRIER 1' along with their respective prices and statuses.

RFQ Name	Segment	Receiving Zone	Shipping Zone	Start Date	End Date	Carrier Name	Market	Load	Loads	Offer Price	Target Pri...	Awa...	Create D...	Note
