

Does Your Supply Chain Align With Your Customer's Expectations?

Consumers have more ways than ever to shop for food. Alternative formats and online delivery options increase every year. Success today for traditional retailers requires flawless execution in every part of the business. It often comes down to having the right product in the right place at the right time. With hundreds of suppliers, orders, deliveries, invoices and data to manage, getting it right is an ongoing challenge.

Effectively managing the supply chain has become a strategic imperative for retail organizations today. Full visibility, supplier collaboration and assessment create the basis for continuous improvement. Supply chain executives must keep quality, cost and competitive advantage top of mind, and getting the order-to-invoice cycle right is essential. Tools that provide collaboration and visibility are essential in the ongoing effort to reduce costs, improve agility and maximize sales.

The Global Food Network

iTradeNetwork is the world's largest food trading network connecting you once to more than 10,000 trading partners. As the industry standard for online order management, iTradeNetwork has extensive experience helping some of the largest retailers in the world manage their fresh food category.

Data Makes The Difference

iTradeNetwork brings real-time data from across the supply chain into one tightly integrated, highly collaborative and functionality rich network. iTradeNetwork transforms the complex world of supplier relationships and performance data into clear actionable information and tactics that save time, reduce waste and most importantly, keep your customers coming back.

"We went through a comprehensive vetting process to ensure we implemented the best supply chain optimization solution to meet our speed-to-market needs and I'm confident that iTradeNetwork's proven track record, technological resources, knowledge, and vision make them the right partner for Sprouts as we keep growing as one of the leaders in the natural and organic industry."

Jim Nielsen, Chief Operating Officer, Sprouts Farmers Market

End-to-end Supply Chain Solutions for Retailers
