

Build your Trading Network with Next-Gen Functionality

The Newest OMS

Building on iTrade's existing OMS platform, Next-Gen OMS takes much of the functionality of OMS and couples it with a modern, efficient interface for **fast moving, ambitious mid-market players**. Next-Gen OMS boasts a **highly-focused feature set** supporting the order-to-cash process for buyers and suppliers. Users can access a full range of trading access options from portal only to full integration, and anything in between, as **OMS Next-Gen offers more than your traditional VAN**. Track progress in real-time with event-oriented dashboards, trade comments instantaneously with partners, and rely on proactive alerting to ensure no order is forgotten. **Eliminate the guesswork and extra steps** from your supply chain with OMS Next-Gen.
