

# iTracefresh Transit

A new solution from the global leader in end-to-end fresh supply chain solutions

New from iTradeNetwork, iTracefresh Transit allows you to efficiently capture and generate a PTI-Palletized Advance Shipment Notice (ASN) that can be sent to any vendor requiring sophisticated product traceability. Regardless of whether you are directly integrated with iTradeNetwork or access iTradeNetwork via our Portal, we have a solution to meet your needs.

### Easily Generate an ASN to comply with buyer requirements including:

- Palletization/Pallet IDs/LPNS
- Lot Information
- Harvest Pack Date
- Expiration Date

### Association of Traceability Info Via Transit Mobile App or Third Party Integration

### Mobile App allows for:

- Pulling of product & quantity data from PO
- Updating of quantity
- Scanning/entry of PTI data
- Tie to pallet ID/LPN
- Submission of ASN

### Integrates with iTrade OMS Order Data

## The Benefits for Suppliers

### Palletized ASN

- Comply with buyer requirements on palletization and traceability
- Speed up buyer receiving time
- Improve buyer satisfaction by increasing shipment and inventory visibility
- Improve payment cycle by speeding up PO/invoice process and reducing order reconciliations
- Reduce loss claims via accurate and data/information about what was shipped

### In-Transit

- Easily communicate traceability information leveraging existing systems
- Mark shipments “In Transit” in a more timely manner
- Minimal impact to existing shipping process

### Mobile App

- Simple, quick workflow to append traceability information to a PO
- Create palletized ASN via a mobile application with no additional integrations required
- Place load in transit immediately upon shipping
